

ANTARANG

Through Antarang Voltas hopes to empower young adults and bridge the gap between education and employment through its 2 structured programs. 'CareerAware' works with youths between the 8th and 10th standard, encouraging them to complete their high school education by showing them the positive impact it can have on their future. 'CareerReady' works with adults between 18-28 and trains them in their core work skills and while also connecting them with employment and entrepreneurship in their fields of interest. We also offer continued support for their professional development for a minimum period of one year.

Through the course of the program, students are exposed to possible employment opportunities through exposure visits to multiple industries. We also invite expert speakers from the program alumni to talk to members about their own career journey as they are able to connect with the youths' situation and circumstances. Interaction with parents is another important facet of the program, because it is imperative that they understand their children's aspirations and opportunities and find ways to help them realize their dreams.
